The Residence

Cara Jacobs
09.08.2024

In the vibrant heart of Singapore, Right Angle Studio is proud to present their latest masterpiece, The Residence. Following the success of ‘Residence L’, this duplex apartment marks a new chapter in the studio’s design journey. The Residence harmoniously combines elements from the past, present and future to create a cohesive spatial experience that pushes boundaries and inspires.

Upon entering The Residence, you are immediately enveloped by an environment that perfectly balances minimalism and purpose. Every zone in the apartment has been carefully designed to facilitate gatherings and encourage deep conversations. The dining area, with its custom-made display shelf seamlessly integrated into the walls, is a shining example of this harmonious design. This shelf, both functional and aesthetic, creates a space that is both practical and poetic. The inviting open kitchen acts as a tribute to the heart of the house. The bar, rich in heritage and modern in execution, urges social interaction and culinary experiences. In the living room, sliding ash screens elegantly divide the space, while offering a glimpse of the serene outdoor garden, which brings a sense of tranquillity and continuity.
