A sneak peek of P5 Studio x Frag's collab project AR_T, where eight local architecture and design practices reinvent the Ele side chair, one of Frag's signature chairs.

P5 Studio is at it again! Following up its successful collaboration with Danish brand Montana Furniture and eight local design practices last year, the boutique furniture retailer has partnered with Italian brand and leading leather expert Frag for AR_T.

AR_T (pronounced 'art') has invited eight local architecture and design practices to reinvent the Ele side chair, one of Frag's signature chairs, into an object that exists in the realm between art

and design. Designed by Michele di Fonzo, Ele features a sinuous silhouette and is upholstered completely with saddle leather.

Saddle leather is arguably the most durable type of leather which requires considerable skill to craft into furniture. The versions of Ele created by the eight practices will be the embodiment of what heritage and craftsmanship mean to them. P5 Studio and Frag will unveil the eight objects on 26 September 2019.
